

## MICHELE PALIERI

### **Description**

Large and long bunch with a round, crunchy berry. It's a very good variety, with a strong conservation. The variety was obtained by M. Palieri crossing Alphonso Lavallée x Red Malaga.

**Sprouting:** medium-late (second decade of April)

**Ripening:** medium (Sicily last decade of August – Veneto 1st decade of September)

**Bunch:** large, cylindrical-pyramidal elongated, sparse, with one or two wings, average weight gr. 700-900.

**Berry:** large (9-10 gr.), cylindrical pyramidal, with a rather firm pruinose skin, with an intense purplish black color; quite crunchy, sweet and juicy pulp and pleasantly flavored

**Vegetal-productive characteristics:** the vigour of the plant is very good and the shoots push upwards.

**Cold resistance:** good

**Diseases resistance:** it's a traditional variety that requires treatments (4-8) with copper and sulfur based products for sustainable agriculture.

## Data Sheet

Grape berry color	Red
Maturation period	1st decade of September, 3rd decade of August
Grape	big, round, with seeds
Flavor	fruity, neutral
Bunch	big, thick
Use	Juices, table
Breeding	creeper, espalier, pergola
Where to plant	city, flat land – under 200 mt, hill 200-500 mt
Suitable for	family vineyards, professional vineyards, vegetable garden
Diseases resistance	Low
Downy mildew bunch	Low
Downy mildew leaves	Low
Powdery mildew leaves	Low
Powdery mildew bunch	Low
Botrytis	Low
Phytosanitary treatments	From 6 to more treatments depending on the climatic conditions with products based on copper and sulfur
Other	old variety
