

ITALIA 307 SO4 60 Gm

Description

Grapevine is known throughout the world for the beauty of its clusters to the berries tasty and crisp and the excellent resistance to transport and shelf life. Obtained by Professor Pirovano in 1911.

Sprouting: medium (after the first ten days of April).

Ripening: late (Sicily 25th of August – 5th of September; Veneto 15th – 30th of September).

Bunch: large, conical-pyramidal, with one or two wings, average weight 600-800 gr.

Berry: large or very large, ellipsoidal, with a consistent and pruinose medium thickness peel, golden or amber yellow in color, crunchy and juicy pulp, sweet with a pleasant muscatel aroma

Vegetal-Productive characteristics : Vigour is high with abundant and constant production.

Cold resistance: very good

Diseases resistance: it's a traditional variety that requires treatments (4-8) with copper and sulfur based products for sustainable agriculture.

Data Sheet

Grape berry color	White
Maturation period	2nd decade of September
Grape	big, oblong, with seeds
Flavor	fruity, muscat
Bunch	big, thick
Use	Juices, jams, table
Breeding	creeper, espalier, pergola, pot
Where to plant	city, flat land – under 200 mt
Suitable for	family vineyards, professional vineyards, vegetable garden
Diseases resistance	Low
Downy mildew bunch	Low
Downy mildew leaves	Low
Powdery mildew leaves	Low
Powdery mildew bunch	Low
Botrytis	Low
Phytosanitary treatments	From 6 to more treatments depending on the climatic conditions with products based on copper and sulfur
Other	old variety
